1. GENERAL

1.01 This section provides actual wiring diagrams for the 35 transmitter distributor bases. Although the answer-back mechanism is mounted on and considered a part of the base assembly, the actual wiring diagram for it will be found in a separate section for the 35 answer-back assembly.

1.02 The section is reissued to include the most current wiring information. Since this is a general revision, marginal arrows have been omitted.

1.03 Schematic wiring diagrams for both the base and the answer-back circuits will be found in the appropriate section covering the set with which these components are used.
